

# Make Air Dry Clay

## Ingredients:

1/2 cup of cornstarch

4 ounces glue

1 tablespoon lemon juice

2 tablespoons vegetable oil

Mix ingredients together. Put in the microwave for 30 seconds. Stir mixture. Put in another 30 seconds and stir well to mix. Add a bit more cornstarch if it seems too runny. Knead dough until smooth. Sculpt your clay into shapes and it will dry overnight. Store any extra clay in a ziplock bag.

## Make Colors

Want to make colored clay? Take a piece of white clay and dab your clay with a marker. Knead the color into your clay. That's it!
