

Make a Bird's Nest

Make a bird's nest at home!

Materials:

Paper bowl or cup

Newspaper

Recycled paper packaging material

Yarn, ribbon, or string

Scissors

Cut the sides of a paper bowl or cup into strips. Then weave long newspaper pieces, yarn, ribbon, or string in and out to make the nest. You can add something soft to the bottom of your nest. Try some recycled materials you get in a package.

Air Dry Clay

If you want to sculpt a bird or eggs for your nest, you can make a batch of homemade air-dry clay.

Ingredients:

1/2 cup of cornstarch

4 ounces glue

1 tablespoon lemon juice

2 tablespoons vegetable oil

Mix ingredients together. Put in the microwave for 30 seconds. Stir mixture. Put in another 30 seconds and stir well to mix. Add a bit more cornstarch if it seems too runny. Knead dough until smooth. Sculpt your bird or eggs and let dry overnight.
